WORK EXPERIENCE

Y2 Solar | Delhi, India

April 2026 - June 2026

Full Stack Developer Intern

- Engineered the company's official website from the ground up using Next.js, React, Tailwind CSS, Supabase, and Three.js, delivering a fast, responsive, and production-ready web application.
- Built 15+ responsive pages and reusable UI components, improving development efficiency while ensuring a consistent experience across desktop, tablet, and mobile devices.
- Developed and integrated RESTful APIs with Supabase for dynamic content management and optimized backend data workflows.
- Created immersive 3D web experiences with Three.js, optimizing rendering performance and interactive animations to enhance user engagement.
- Enhanced website performance and SEO by implementing server-side rendering (SSR), metadata optimization, semantic HTML, image optimization, and Core Web Vitals best practices.
- Collaborated closely with designers and stakeholders to transform business requirements into scalable features, following clean architecture, component-driven development, Git-based version control, and modern development best practices.

PROJECTS

Arena AI | AI Model Comparison Platform | (Live Link :- <https://ai-battle-arena-eta.vercel.app/login>)

Oct. 2025

- Built a full-stack AI platform where Mistral and Cohere compete on the same prompt with real-time responses.
- Developed an automated 0-10 scoring engine evaluating relevance, accuracy, and clarity, with intelligent winner selection.
- Reduced response latency by 40-60% through parallel API orchestration, achieving 1-3 second response times.
- Engineered a scalable backend supporting 10+ concurrent sessions and plug-and-play integration of additional LLM providers.
